## Histone H3S10pK14ac, synthetic

Catalog number: AH3-3002

25 µg

# Almac Peptide and Protein Technologies

Chemokines

**Custom Peptides** 

Site-Specific protein labelling

#### **Modified Histones**

Ubiquitylated peptides

## **Background**

Histones are globular proteins that are subject to a wide variety of post-translational modifications <sup>1, 2</sup>. These histone modifications, which occur predominantly on the unstructured N-terminal tails, form an epigenetic code central in the regulation of regular and disease-specific cellular processes, in particular DNA replication, repair and transcription <sup>3, 4</sup>. Our synthetic modified histones correspond exactly to the sequences of the natural modified Histones, containing no amino acid replacements or residue analogs, and can be used in a variety of applications, such as substrates for specific histone modification enzymes, protein

binding assays and the generation of chromatin preparations.

#### **Product Information**

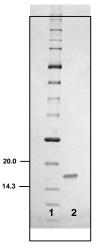

Sequence: ARTKQTARKS(p) TGGK(Ac)APRKQL ATKAARKSAP

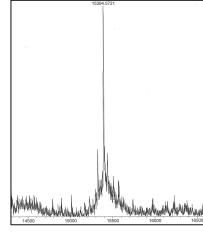

ATGGVKKPHR YRPGTVALRE IRRYQKSTEL LIRKLPFQRL VREIAQDFKT DLRFQSSAVM ALQEACEAYL VGLFEDTNLC

AIHAKRVTIM PKDIQLARRI RGERA

Purity: >95% by Coomassie-stained SDS-PAGE under reducing conditions

**Determined Mass:** 15 394.6 Da

Synthetic
H3S10pK14ac
analysed by SDSPAGE (lane 1 MW
marker; lane 2
H3S10pK14ac).
Product mass
determined by ESI-TOF
mass spectrometry
(expected mass
15 394.9 Da)

Formulation / White powder, lyophilized.

**Appearance:** Protein content determined by Bradford assay.

### **Preparation and Storage**

Reconstitution / Storage:

It is recommended that unopened vials are stored at -20  $^{\circ}$  to -70  $^{\circ}$  for periods of up to 12 months. Avoid repeat freeze-thaw cycles.

Centrifuge vials prior to opening.

Reconstitute in water or a suitable buffer for your assay.

Not fully tested. For research use only. Not for use in human diagnostic or therapeutic procedures.
